

## **Engineering - Mechanical**

**Speaker: Martin Nordby**

Mr. Martin Nordby received his B.S. in Mechanical Engineering from Stanford University. He works at SLAC National Accelerator Laboratory as the Systems Integration Manager for the LSST project, a ground-based 8 meter class telescope to investigate the nature of dark energy and evolution of the universe. While at SLAC, Mr. Nordby has served as mechanical design engineer, mechanical installation manager, and systems integration lead for a number of physics research instruments, and worked with engineers and scientists from many fields.
