Equipment connectors for Laptops to Projectors in MV Classrooms

Monta Vista has LCD projectors in each room, but they are only VGA compatible. This is what a VGA cable and port looks like:

Many newer Windows computers may not have a VGA port, but instead will have an HDMI port. An HDMI cable and port looks like this:

If your laptop has only an HDMI port, you will need an HDMI to VGA adapter like this:

Likewise, if you have a MacBook, you'll need an Apple Displayport to VGA adapter for the specific generation of your Apple computer, like this:
